PERSONAL PROFILE

Analytical and detail-oriented postgraduate student currently pursuing an MSc in International Management & Global Business at the University of Limerick, with a strong background in data analytics, AI workflow automation, business research, and computational statistics. Experienced in analysing datasets, automating workflows, conducting research, and supporting data-driven decision-making through academic and AI-focused projects.

Skilled in Excel, SQL, Python, Node.js, AI frameworks and automation tools, reporting, and stakeholder communication, with strong organisational, problem-solving, and collaboration abilities developed through leadership and volunteering experience. Seeking graduate and entry-level opportunities in business analysis, operations, AI-enabled business solutions, reporting, and analytics-focused roles.

EDUCATION

MSc International Management & Global Business

Sept 2025 – Aug 2026

University of Limerick, Ireland

Expected award: 2:1 honours

Integrated MSc in Computational Statistics & Data Analytics

Sept 2020 – May 2025

Vellore Institute of Technology (VIT), India

First class honours (CGPA 8.11 / 10) – Graduated top of class from a top 20 university in India

KEY SKILLS

Business & Analytical Skills: Business Analysis, Data Analysis & Reporting, Process Improvement, Strategic Thinking, KPI Reporting, Decision Support, Organisational Research, Quantitative & Qualitative Analysis, Business Process Optimisation, Digital Transformation, Stakeholder Coordination

AI & Technical Skills: Excel, SQL, Python, Node.js, JavaScript, API Integration, AI Workflow Automation, Multi-Agent AI Systems, AI Agent Orchestration, Prompt Engineering, Large Language Models (LLMs), CrewAI, OpenRouter, Cloud Deployment (Render), Dashboard Development, Data Visualisation, Predictive Modelling, Machine Learning Fundamentals

Professional Skills: Communication & Presentation, Cross-Cultural Collaboration, Team Coordination, Attention to Detail, Time Management, Adaptability, Documentation & Reporting

RESEARCH EXPERIENCE

Master's Thesis (Ongoing) | University of Limerick, Ireland

May 2026 – Present

Recruitment Signalling and Global Talent Expectations in Multinational Organisations

- Conducting empirical research on how multinational organisations communicate expectations for early-career global talent through graduate recruitment programmes
- Collecting and analysing recruitment communication data from multinational company career platforms across multiple industries
- Applying computational text analysis and topic modelling techniques to identify emerging talent and organisational themes

- Evaluating recruitment messaging using international HRM, organisational behaviour, and Signalling Theory frameworks
- Producing research findings focused on talent attraction, employer branding, and workforce expectations in global organisations

PROJECT EXPERIENCE

AI Content Automation Platform | Multi-Agent Workflow System May 2026

- Built and deployed an AI-powered content automation platform integrating multi-agent workflows, research pipelines, and AI-driven content generation systems
- Developed automation workflows for LinkedIn content generation, carousel creation, and AI-driven publishing processes using Node.js and OpenRouter
- Implemented AI orchestration architecture combining workflow automation, dashboard monitoring, and cloud deployment systems
- Designed a cloud-hosted dashboard for monitoring workflow outputs and automation pipelines

Multi-Agent AI Systems | Orchestration & Infrastructure Engineering May 2026

- Designed and executed multi-agent AI workflows using CrewAI, Hermes, and OpenRouter to automate research and content generation tasks
- Applied AI engineering concepts involving large language models, agents, memory systems, and workflow orchestration

Music Recommendation & Genre Classification System Jan 2024 – Apr 2024

- Analysed user behaviour data using Python and SQL to support recommendation logic, achieving 92.9% accuracy in music genre classification
- Evaluated model outputs and communicated findings clearly

Customer Attrition Analysis Aug 2023 – Nov 2023

- Analysed 10,000+ customer records using predictive modelling and machine learning techniques, achieving 80% prediction accuracy
- Developed insights to support retention-focused decision-making

VOLUNTEER EXPERIENCE

Secretary | International Society, University of Limerick 2025 – 2026 (Ongoing)

- Coordinated communication and operational support for multicultural student initiatives and events

Registered Volunteer | PVA, University of Limerick Oct 2025 – May 2026

- Participated in structured volunteering initiatives while balancing postgraduate academic responsibilities

Academic Support Volunteer | Make A Difference (MAD), India Sept 2021 – Aug 2022

- Mentored orphaned students through structured academic guidance and tutoring support
